I. WAGE AND SALARY EARNERS IN EMPLOYMENT

..	Explanatory Notes	2
1.	Total Civilian Employees and Defence Forces : Australia - June, 1954 to January, 1965	3
	Wage and Salary Earners in Civilian Employment -	
2.	States and Territories - June, 1954 to January, 1965	4
3.	Industry Groups and Sub-groups : States - January, 1965	5
4.	Industry Groups and Sub-groups : Australia - December, 1963 to January, 1965	7
5.	Manufacturing Industry - Principal Sub-groups : Australia - December, 1963 to January, 1965	10
6.	Private and Government : Australia - June, 1954 to January, 1965	12
7.	Civilian Employees of Government Bodies : States and Territories - January, 1965	13

II. EMPLOYEES IN LARGER PRIVATE FACTORIES

..	Explanatory Notes	13
	All Factories in Survey	
8.	Total, Six States - January, 1964 to February, 1965	14
9.	States - January, 1964 to February, 1965	14
	Factories other than Food, etc. Factories -	
10.	Total, Six States - January, 1964 to February, 1965	15
11.	States - January, 1964 to February, 1965	15
12.	Industry Groups, Five Mainland States - January, 1964 to February, 1965	16

III. CIVILIAN WORK FORCE ESTIMATES - SIX STATE CAPITALS

..	Explanatory Notes	17
	Six Australian State Capital Cities - Civilian Population 14 years of age and over -	
13.	Occupational Status - May, 1961 to November, 1964	19
14.	Work Force Participation and Unemployment Rates, by Age Group and Conjugal Condition - August, 1961 to November, 1964	20

IV. REGISTERED UNEMPLOYED AND NUMBER ON BENEFIT

15.	Persons Registered for Employment with Commonwealth Employment Service - June, 1958 to February, 1965	21
16.	Number receiving Unemployment Benefit - June, 1958 to February, 1965	22

I. WAGE AND SALARY EARNERS IN EMPLOYMENT

The series contained in this section are based on comprehensive data (referred to herein as "benchmarks") derived for the purpose from the Population Censuses of June, 1954 and June, 1961.

2. Figures for periods between and subsequent to the two benchmark points of time are estimates obtained from three main sources, namely, (a) current Pay-roll Tax returns; (b) current returns from Government bodies; and (c) some other direct current records of employment (e.g. for hospitals). Data from these sources have been supplemented by estimates of the changes in number of wage and salary earners not covered by the foregoing collections.

3. Figures for current months are subject to revision. As they become available, particulars of employment obtained from other collections, such as the annual factory census and the censuses and sample surveys of retail establishments, are used to check, and, where desirable, to revise estimates in relevant sections. The work force survey (see Section III) will supply an additional check for future estimates.

4. The benchmark figures are derived from particulars recorded for individuals on population census schedules. The estimated monthly figures are derived mainly from reports supplied by employers, relating to enterprises or establishments. These two sources differ in some cases in scope and in reporting of industry; however, the industry dissection of the benchmark total has been adjusted, as nearly as may be, to an enterprise/establishment reporting basis. The industry classification used throughout the series is that of the Population Census of June, 1961.

5. Pay-roll Tax returns are lodged at present by all employers paying more than £200 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1962). At June, 1954 this Act required employers paying wages of more than £80 a week to lodge returns. The exemption limit was raised to £120 a week from 1st September, 1954 and to the present level of £200 a week as from 1st September, 1957.

6. Employees in rural industry and in private domestic service are not included in the estimates, because of the inadequacy of current data.

7. The figures herein relate to "Wage and Salary Earners" on pay-rolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include some persons working part-time.

8. The prime purpose of this series is to measure, as nearly as may be with available data, current monthly trends in employment in the defined field. The estimates are subject to less reliability for longer-term measurement.

NOTE:- All figures in tables in this section are shown in thousands correct to one decimal place. Any discrepancies between totals and sums of components are due to rounding.

* See NOTE, page 2. (a) See note (a) to Table 6. Excludes State and Local government employees (3.4 thousand persons in December, 1964) engaged in rural industry, or in private homes as employees of government emergency housekeeper services. Also excludes defence forces (see Table 1 on page 3). (b) Includes semi-government bodies.

II. EMPLOYEES IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger private factories undertaken by joint arrangement between the Department of Labour and National Service and this Bureau. The survey covers practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees.

2. The results of the survey give an earlier indication of current monthly trends in private factory employment than is available from any other source, and the trends in employment in these larger private factories are broadly consonant with those shown by the subsequent estimates of total private factory employment. It should be noted, however, that the figures in this section include persons on strike but exclude persons stood down as a result of an industrial dispute. To this extent they differ from the employment estimates in Section I of this bulletin. The latter exclude all persons who, as a result of an industrial dispute, are not shown on employers' payrolls.

3. Employers co-operating in the survey are asked to supply, as at the last pay-day in the month, the number of employees in the factory or on the factory office staff, providing their employment is directly related to manufacture. Selling and distribution staff are excluded.

4. Employment in factories in the industry group "food, drink and tobacco" is subject to considerable seasonal fluctuation. In order to isolate the effect of such seasonal movements, separate tables have been included in this section to show the movement in employment in factories other than food, drink and tobacco factories.

5. The table showing employment in industrial groups includes particulars for only the five mainland States. Figures for Tasmania cannot be included because of the possibility of disclosing individual factory particulars.

6. In order to keep the survey as representative as possible, the list of factories included is revised at the beginning of each year. When comparing employment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year.

III. CIVILIAN WORK FORCE - SIX STATE CAPITAL CITIES

1. Introduction. - Estimates of the Civilian Work Force in this section are based on results of surveys of a sample of households selected by area sampling methods in the six Australian State capital cities. The first survey was conducted in November, 1960, and surveys have been conducted at quarterly intervals since that date. The surveys are conducted in February, May, August and November each year. The survey information is obtained by personal interview at about 18,500 sample households which are visited during a four-week period each quarter by specially trained enumerators. Each person included in the surveys is classified by work force characteristics on the basis of his actual activity during the previous week as reported to the enumerator.

2. Population Coverage. - The sample used in the surveys covers the metropolitan areas, comprising the six Australian State capital cities as defined for statistical purposes. The enumeration includes all persons, 14 years of age and over, living in selected households, with the exception of:-

- (a) members of the permanent armed services, and
- (b) non-Australian diplomatic staff and non-Australian members of their households.

The surveys are currently in process of extension to non-metropolitan areas and it is expected that estimates for the whole of Australia will be published later this year.

3. Classification of the Work Force. - The classification used in the surveys conforms closely to that recommended by the Eighth International Conference of Labour Statisticians held in Geneva in 1954. In this classification, the work force category to which an individual is assigned depends on his actual activity (i.e. whether working, looking for work, etc.) for a specified week during the four-week period covered by the surveys. A person's activity during the specified week is determined from answers given to a set of questions specially designed for this purpose. The principal categories appearing in the tables in this bulletin are the employed and unemployed, which together constitute the work force, and the remainder who are not in the work force. Details of the classification used are as follows :-

(i) Employed Persons: all those who, during the specified week:

- (a) did any work for pay, profit, commission or payment in kind, in a job or business, or on a farm (the category includes employees, employers and workers on own account), or
- (b) worked 15 hours or more without pay in a family business (or farm), or
- (c) had a job, business or farm, but were not at work, because of illness, accident, leave or holiday, industrial dispute, or because of production hold-up due to bad weather, plant break-down, etc.

Persons who had a job but were temporarily laid off by their employers for the whole week without pay are excluded, and are classified in the tables as unemployed. Persons who did some work during the week, however, before they either lost their jobs or were laid off, are classified as employed.

(ii) Unemployed Persons: all those who, during the specified week, did no work at all, and

- (a) did not have a job or business and were looking for work (including those who stated that they would have looked for work had they not been temporarily ill, and those who would have looked for work had they not already made definite arrangements to start work in a new job after the specified week), or
- (b) were laid off from their jobs without pay for the whole week.

Persons who either lost their jobs or were laid off during the specified week, but did some work during that week, are classified as employed.

- (iii) The Work Force: comprises all persons, who, during the specified week, were employed or unemployed as defined in (i) and (ii) above.
- (iv) Persons Not in the Work Force: those who, during the specified week, were not classified as employed or unemployed. This category therefore includes persons without a job, business or farm and not looking for work, who, during the specified week, were:

keeping house (unpaid)
 attending a school or university
 retired or voluntarily idle
 permanently unable to work
 inmates of institutions.

4. Nature of Estimates. - Since the survey estimates are based on a sample they are subject to sampling variability, that is, variations that might occur by chance because only a sample of the population is enumerated. Further information on variability of survey estimates is available on request.

In addition to the factors referred to above, the attention of users of the statistics in this section is directed to the fact that figures in Table 13 are rounded but not adjusted to add to totals because such adjustment would, in some cases, exceed the sampling variability of the estimate and tend to destroy its value as an indicator of movement.

NOTE:- A brief summary of the results of work force surveys for the period May, 1961 to November, 1964 is given in Tables 13 and 14. More detailed figures were published in the December, 1964 issue of this bulletin.

(a) Includes wage and salary earners, employers, self-employed persons, and unpaid helpers who worked 15 hours or more per week in a family business. (b) The civilian work force as a percentage of the civilian population 14 years of age and over. (c) The unemployed as a percentage of the civilian work force. (d) Metropolitan area boundaries of Melbourne, Brisbane and Hobart, as defined for statistical purposes, were changed in June, 1961, by inclusion of additional areas. Figures for May, 1961 are therefore not strictly comparable with those for later surveys.
